Invented for life

LBB 4432/00 Call Station Keypad

▶ **Eight freely programmable selection keys**

▶ **Serial data and power interface to call station basic**

▶ **Up to 16 keypads can be connected to one call station basic**

▶ **Activation indicator for each key**

▶ **Stylish and modern design**

The call station keypad is used in combination with the call station basic to make manual or pre-recorded announcements to any assigned zones, to select the zones or to execute pre-defined actions. The call station keypad has eight programmable buttons, each with a two-color status LED.

Functions

The keys of the call station keypad can be programmed for actions, such as:

- Controlling functions: selection recall, call activation, cancel selection, BGM off, BGM volume control, fault acknowledgement, etc.
- Selecting sources: BGM channel, pre-recorded messages, attention and alarm tones
- Selecting destinations: zones and zone groups

The keys can be programmed for different modes of operation, such as momentary or toggle. Each key has one two-color status LED beside it. Beside each LED is a transparent, removable tab that can hold a function or zone label for the key. Safety covers to prevent accidental activation of the keys are available as an option.

The keypad gets its power from the call station it is connected to.

Controls and indicators

- Eight function keys

- Eight two-color LEDs

Interconnections

- Two serial data and power connections
