LBC 3094/15 Sound Projector

www.boschsecurity.com

- ▶ Suitable for speech and music reproduction
- ▶ Simple power setting
- ▶ 2 m fixed connection cable
- ► Splash-waterproof
- ▶ Robust self-extinguishing ABS enclosure to UL 94 VO

The LBC 3094/15 is a sound projector for speech and music reproduction in indoor or outdoor applications such as shopping centers, factory grounds and sports fields.

Functions

Sound projectors are intended for applications where directing the sound beam is desirable. Similar in concept to a spotlight, a sound projector can be used to provide localized sound reproduction. Typical examples include restaurants, exhibitions, factory grounds and shopping centers.

The sound projectors are splash waterproof and suitable for outdoor use and in environments with high humidity levels such as swimming pools.

The enclosures are made from high-impact self-extinguishing ABS (acc. to class UL 94 VO). The sound projector enclosures are colored off-white and supplied with steel mounting brackets painted in off-white. They are suitable for mounting onto walls or ceilings.

Certifications and Approvals

All Bosch loudspeakers are designed to withstand operating at their rated power for 100 hours in accordance with IEC 268-5 Power Handling Capacity (PHC) standards. Bosch has also developed the Simulated Acoustical Feedback Exposure (SAFE) test to demonstrate that they can withstand two times their rated power for short durations. This ensures extra reliability under extreme conditions, leading to higher customer satisfaction, longer operating life, and much less chance of failure or performance deterioration.

All plastic parts are manufactured from self-extinguishing high-impact ABS material (according to UL 94 V0). In common with all Bosch products, care is taken to meet high safety standards. These sound projectors comply with all the relevant safety and installation regulations of EN 60065.

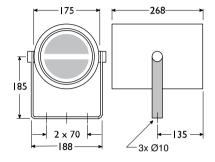

Water and dust according protection

| Region | Certification |
|--------|---------------|
| Europe | CE |

Installation/Configuration Notes

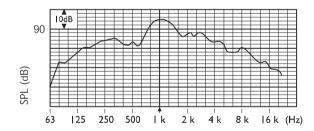

All units are supplied with a color-coded four-core connecting cable with each color connected to a different primary tap on the 100 V matching transformer. This allows nominal full-power, half-power or quarter-power radiation to be selected (in 3 dB steps).
